Contents of Volume 164 · 1995

Altmann F → Rath J
Amako K → Fujita M
Amako K → Wai SN
Anderson E → Baldwin WW
Ascencio F, Johansson G, Wadström T: Cell-surface charge and cell-surface hydrophobicity of collagen-binding *Aeromonas* and *Vibrio* strains 223
Atzeni M → Marchini A

Baldwin WW, Myer R, Powell N, Anderson E, Koch AL: Buoyant density of *Escherichia coli* is determined solely by the osmolarity of the culture medium 155
Barz W → Klus K
Becker S → Unden G
Beeder J, Torsvik T, Lien T: *Thermodesulforhabdus norvegicus* gen. nov., sp. nov., a novel thermophilic sulfate-reducing bacterium from oil field water 331
Behrens D → Ehrich S
Beuerle J → Eisenmann E
Bock E → Ehrich S
Boekema EJ → Hensgens CMH
Bongaerts J → Unden G
Bonting CFC, Schneider S, Schmidtberg G, Fuchs G: Anaerobic degradation of *m*-cresol via methyl oxidation to 3-hydroxybenzoate by a denitrifying bacterium 63
Bowien S → Müller V
Brandsch R → Menéndez C
Braun F-J → Keller M
Burggraf S → Huber R
Burggraf S → Keller M
Burkovski A, Weil B, Krämer R: Glutamate excretion in *Escherichia coli*: dependency on the *relA* and *spoT* genotype 24

Callahan SM → Dunlap PV
Coates JD, Lonergan DJ, Philips EJP, Jenter H, Lovley DR: *Desulfuromonas palmitatis* sp. nov., a marine dissimilatory Fe(III) reducer that can oxidize long-chain fatty acids 406
Cole J → Metheringham R
Compain P → Schmitt MJ
Copass M → Marchini A
Crooke H → Metheringham R
Cypionka H → Fuseler K

Da Costa MS → Moreira LM
Dahl C → Pattaragulwanit K
d'Apolito M → Marchini A
Deppenmeier U: Different structure and expression of the operons encoding the membrane-bound hydrogenases from *Methanosarcina mazei* Gö1 370
Diez-Gonzalez F, Russell JB, Hunter JB: The role of an NAD-independent lactate dehydrogenase and acetate in the utilization of lactate by *Clostridium acetobutylicum* strain P262 36
Dilling W, Liesack W, Pfennig N: *Rhabdochromatium marinum* gen. nom. rev., sp. nov., a purple sulfur bacterium from a salt marsh microbial mat 125
Dirmeier R → Keller M
Domínguez-Gutiérrez G → Martínez-Cadena G
Dubreucq E → Perrier V
Dunlap PV, Kita-Tsukamoto K, Waterbury JB, Callahan SM: Isolation and characterization of a visibly luminous variant of *Vibrio fischeri* strain ES114 from the sepiolid squid *Euprymna scolopes* 194

Ehrich S, Behrens D, Lebedeva E, Ludwig W, Bock E: A new obligately chemolithoautotrophic, nitrite-oxidizing bacterium, *Nitrospira moscoviensis* sp. nov. and its phylogenetic relationship 16
Eisenmann E, Beuerle J, Sulger K, Kroneck PMH, Schumacher W: Lithotrophic growth of *Sulfurospirillum deleyianum* with sulfide as electron donor coupled to respiratory reduction of nitrate to ammonia 180
Elorza MV → Ruiz-Herrera J

Feicht R → Huber C
Ferguson SJ → Moir JWB
Ferrer E → Suárez M
Forsythe S → Metheringham R
Freudenberg M → Rau H
Friedrich M, Schink B: Isolation and characterization of a desulforubidin-containing sulfate-reducing bacterium growing with glycolate 271
Fuchs G → Bonting CFC
Fujimoto S → Fujita M
Fujita M, Morooka T, Fujimoto S, Moriya T, Amako K: Southern blotting analyses of strains of *Campylobacter fetus* using the conserved region of *sapA* 444
Fuseler K, Cypionka H: Elemental sulfur as an intermediate of sulfide oxidation with oxygen by *Desulfobulbus propionicus* 104

Galzy P → Perrier V
Gambacorta A → Jeanthon C
Garrido-Pertierra A → Suárez M
Gibson J → Küver J
Glénat P → Jeanthon C
González JM, Kato C, Horikoshi K: *Thermococcus peptonophilus* sp. nov., a fast-growing, extremely thermophilic archaebacterium isolated from deep-sea hydrothermal vents 159
Griffiths L → Metheringham R
Grimme LH → Thies F

Hafenbradl D → Keller M
Hamasaki N → Wai SN
Hansen TA → Hensgens CMH
Harmsen HJM → Oude Elferink SJWH
Hartzell PL, Youderian P: Genetics of gliding motility and development in *Myxococcus xanthus* 309
Hauschild E → Wallrabenstein C
Hayes PK, Powell RS: The *gvpA/C* cluster of *Anabaena flos-aquae* has multiple copies of a gene encoding GvpA 50
Heine H → Schletter J
Henninger H → Menéndez C
Hensgens CMH, Jansen M, Nienhuis-Kuiper ME, Boekema EJ, Van Breemen JFL, Hansen TA: Purification and characterization of an alcohol dehydrogenase from 1,2-propanediol-grown *Desulfovibrio* strain HDv 265
Hinson D → Norris PR
Höltje J-V: From growth to autolysis: the murein hydrolases in *Escherichia coli* 243
Hohenhaus S → Huber R
Holighaus G → Unden G
Horikoshi K → González JM
Hougardy A, Klemme J-H: Nitrate reduction in a new strain of *Rhodoferax fermentans* 358
Huber C, Skopan H, Feicht R, White H, Simon H: Pterin cofactor, substrate specificity, and observations on the kinetics of the reversible tungsten-containing aldehyde oxidoreductase from *Clostridium thermoaceticum*. Preparative reductions of a series of carboxylates to alcohols 110
Huber R, Stöhr J, Hohenhaus S, Rachel R, Burggraf S, Jannasch HW, Stetter KO: *Thermococcus chitonophagus* sp. nov., a novel, chitin-degrading, hyperthermophilic archaeum from a deep-sea hydrothermal vent environment 255
Hunter JB → Diez-Gonzalez F

Igloi G → Menéndez C
Iordan EP, Petukhova NI: Presence of oxygen-consuming ribonucleotide reductase in corrinoid-deficient *Propionibacterium freudenreichii* 377
Iranzo M → Ruiz-Herrera J

Jannasch HW → Huber R
Jannasch HW → Muyzer G
Jansen M → Hensgens CMH
Janssen PH, Liesack W: Succinate decarboxylation by *Propionigenium maris* sp. nov., a new anaerobic bacterium from an estuarine sediment 29
Jeanthon C, Reysenbach A-L, L'Haridon S, Gambacorta A, Pace NR, Glénat P, Prieur D: *Thermotoga subterranea* sp. nov., a new thermophilic bacterium isolated from a continental oil reservoir 91
Jenter H → Coates JD
Johansson G → Ascencio F

Kato C → González JM
Keller M, Braun F-J, Dirmeier R, Hafenbradl D, Burggraf S, Rachel R, Stetter KO: *Thermococcus alcaliphilus* sp. nov., a new hyperthermophilic archaeum growing on polysulfide at alkaline pH 390

Kita-Tsukamoto K → Dunlap PV
Klemme J-H → Hougardy A
Klus K, Barz W: Formation of polyhydroxylated isoflavones from the soybean seed isoflavones daidzein and glycitein by bacteria isolated from tempe 428
Koch AL → Baldwin WW
Konings WN, Lolkema JS, Poolman B: The generation of metabolic energy by solute transport 235
Kosma P → Rath J
Krämer R → Burkovski A
Krämer R → Siewe RM
Kroneck PMH → Eisenmann E
Kubicek CP → Rath J
Kučera I → Mařchová I
Küver J, Xu Y, Gibson J: Metabolism of cyclohexane carboxylic acid by the photosynthetic bacterium *Rhodopseudomonas palustris* 337

Lebedeva E → Ehrich S
L'Haridon S → Jeanthon C
Lien T → Beeder J
Liesack W → Dilling W
Liesack W → Janssen PH
Lolkema JS → Konings WN
Lonergan DJ → Coates JD
Lovley DR → Coates JD
Ludwig W → Ehrich S

Maas RN → Oude Elferink SJWH
März L → Rath J
Marchini A, d'Apolito M, Massari P, Atzeni M, Copass M, Olivieri R: Cyclodextrins for growth of *Helicobacter pylori* and production of vacuolating cytotoxin 290
Martín HJM → Suárez M
Martínez-Cadena G, Saavedra-Calixto J, Messina-Valencia G, Domínguez-Gutiérrez G, Novoa-Martínez G: Effect of carbon source and pH of the growth medium on spore germination in *Phycomyces blakesleeanus* 231
Massari P → Marchini A
Mařchová I, Kučera I: Formation of active nitrite reductase (cytochrome cd_1) in the strain *Paracoccus denitrificans* HUUG25 58
Mayer H → Rau H
Menéndez C, Igloi G, Henninger H, Brandsch R: A pAO1-encoded molybdopterin cofactor gene (*moaA*) of *Arthrobacter nicotinovorans:* characterization and site-directed mutagenesis of the encoded protein 142
Messina-Valencia G → Martínez-Cadena G
Messner R → Rath J
Metheringham R, Griffiths L, Crooke H, Forsythe S, Cole J: An essential role for DsbA in cytochrome *c* synthesis and formate-dependent nitrite reduction by *Escherichia coli* K-12 301
Moir JWB, Richardson DJ, Ferguson SJ: The expression of redox proteins of denitrification in *Thiosphaera pantotropha* grown with oxygen, nitrate, and nitrous oxide as electron acceptors 43
Moreira LM, Da Costa MS, Sá-Correia I: Plasmid RFLP profiling and DNA homology in *Thermus* isolated from hot springs of different geographical areas 7
Morgan NS → Paoli GC
Mori Y: Nutritional interdependence between *Thermoanaerobacter thermohydrosulfuricus* and *Clostridium thermocellum* 152
Moriya T → Fujita M
Mormeneo S → Ruiz-Herrera J
Morooka T → Fujita M
Müller V, Bowien S: Differential effects of sodium ions on motility in the homoacetogenic bacteria *Acetobacterium woodii* and *Sporomusa sphaeroides* 363
Murrell JC → Norris PR
Muyzer G, Teske A, Wirsen CO, Jannasch HW: Phylogenetic relationships of *Thiomicrospira* species and their identification in deep-sea hydrothermal vent samples by denaturing gradient gel electrophoresis of 16S rDNA fragments 165
Myer R → Baldwin WW

Nienhuis-Kuiper ME → Hensgens CMH
Norris PR, Murrell JC, Hinson D: The potential for diazotrophy in iron- and sulfur-oxidizing acidophilic bacteria 294
Novoa-Martínez G → Martínez-Cadena G

Ogawa J, Shimizu S: Purification and characterization of dihydroorotase from *Pseudomonas putida* 353
Olivieri R → Marchini A
Olukoshi ER → Packter NM
Oude Elferink SJWH, Maas RN, Harmsen HJM, Stams AJM: *Desulforhabdus amnigenus* gen. nov. sp. nov., a sulfate reducer isolated from anaerobic granular sludge 119

Pace NR → Jeanthon C
Packter NM, Olukoshi ER: Ultrastructural studies of neutral lipid localisation in *Streptomyces* 420
Paoli GC, Morgan NS, Tabita FR, Shively JM: Expression of the *cbbLcbbS* and *cbbM* genes and distinct organization of the *cbb* Calvin cycle structural genes of *Rhodobacter capsulatus* 396
Pattaragulwanit K, Dahl C: Development of a genetic system for a purple sulfur bacterium: conjugative plasmid transfer in *Chromatium vinosum* 217
Perrier V, Dubreucq E, Galzy P: Fatty acid and carotenoid composition of *Rhodotorula* strains 173
Petukhova NI → Iordan EP
Pfennig N → Dilling W
Philips EJP → Coates JD
Poolman B → Konings WN
Powell N → Baldwin WW
Powell RS → Hayes PK
Prieur D → Jeanthon C

Rabus R, Widdel F: Conversion studies with substrate analogues of toluene in a sulfate-reducing bacterium, strain Tol2 448
Rachel R → Huber R
Rachel R → Keller M
Rath J, Messner R, Kosma P, Altmann F, März L, Kubicek CP: The α-D-mannan core of a complex cell-wall heteroglycan of *Trichoderma reesei* is responsible for β-glucosidase activation 414
Rau H, Seydel U, Freudenberg M, Weckesser J, Mayer H: Lipopolysaccharide of *Rhodospirillum salinarum* 40: structural studies on the core and lipid A region 280
Reysenbach A-L → Jeanthon C
Richardson DJ → Moir JWB
Rietschel ET → Schletter J
Ruiz-Herrera J, Iranzo M, Elorza MV, Sentandreu R, Mormeneo S: Involvement of transglutaminase in the formation of covalent cross-links in the cell wall of *Candida albicans* 186
Russell JB → Diez-Gonzalez F

Saavedra-Calixto J → Martínez-Cadena G
Sá-Correia I → Moreira LM
Schink B → Friedrich M
Schink B → Wallrabenstein C
Schirawski J → Unden G
Schletter J, Heine H, Ulmer AJ, Rietschel ET: Molecular mechanisms of endotoxin activity 383
Schmidtberg G → Bonting CFC
Schmitt MJ, Compain P: Killer-toxin-resistant *kre12* mutants of *Saccharomyces cerevisiae:* genetic and biochemical evidence for a secondary K1 membrane receptor 435
Schneider S → Bonting CFC
Schumacher W → Eisenmann E
Sentandreu R → Ruiz-Herrera J
Seydel U → Rau H
Shimizu S → Ogawa J
Shively JM → Paoli GC
Siewe RM, Weil B, Krämer R: Glutamine uptake by a sodium-dependent secondary transport system in *Corynebacterium glutamicum* 98
Simon H → Huber C
Six S → Unden G
Skopan H → Huber C
Sprenger GA: Genetics of pentose-phosphate pathway enzymes of *Escherichia coli* K-12 324
Stams AJM → Oude Elferink SJWH
Stetter KO → Huber R
Stetter KO → Keller M
Stöhr J → Huber R
Suárez M, Martín M, Ferrer E, Garrido-Pertierra A: Purification and characterization of 4-hydroxybenzoate 3-hydroxylase from a *Klebsiella pneumoniae* mutant strain 70
Sulger K → Eisenmann E
Suutari M: Effect of growth temperature on lipid fatty acids of four fungi (*Aspergillus niger, Neurospora crassa, Penicillium chrysogenum,* and *Trichoderma reesei*) 212

Tabita FR → Paoli GC
Takade A → Wai SN
Takata T → Wai SN
Teske A → Muyzer G

Thies F, Grimme LH: *O*-Dealkylation of coumarin and resorufin ethers by unicellular green algae: kinetic properties of *Chlorella fusca* and *Chlorella sorokiniana* 203
Torsvik T → Beeder J

Ulmer AJ → Schletter J
Unden G, Becker S, Bongaerts J, Holighaus G, Schirawski J, Six S: O_2-Sensing and O_2-dependent gene regulation in facultatively anaerobic bacteria 81

Van Breemen JFL → Hensgens CMH

Wadström T → Ascencio F
Wai SN, Takata T, Takade A, Hamasaki N, Amako K: Purification and characterization of ferritin from *Campylobacter jejuni* 1
Wallrabenstein C, Hauschild E, Schink B: *Syntrophobacter pfennigii* sp. nov., new syntrophically propionate-oxidizing anaerobe growing in pure culture with propionate and sulfate 346
Waterbury JB → Dunlap PV
Weckesser J → Rau H
Wehrmeyer W → Westermann M
Weil B → Burkovski A
Weil B → Siewe RM
Westermann M, Wehrmeyer W: A new type of complementary chromatic adaptation exemplified by *Phormidium* sp. C86: changes in the number of peripheral rods and in the stoichiometry of core complexes in phycobilisomes 132
White H → Huber C
Widdel F → Rabus R
Wirsen CO → Muyzer G

Xu Y → Küver J

Youderian P → Hartzell PL
